kiryowajoshua22@gmail.com | +1 (254) 400-9785 | joshuamukisa.com | linkedin.com/in/joshua-mukisa | github.com/Josh-The-Developa

Software engineer with 6 years of experience building web applications using React, Node.js, and the MERN stack. Co-founded and developed a profitable cloud-based School Information System currently in production at a Ugandan institution and on track for national expansion. Engineered a cloud-based e-voting platform that has powered student council elections at Aga Khan High School Kampala, part of the Aga Khan Education Services agency under the Aga Khan Development Network, every year since 2022 with no replacement in sight. Together, these systems serve 1,000+ students.

EDUCATION

Baylor University

Bachelor of Science in Computer Science — Waco, TX

Expected: May 2029

GPA: 3.51 / 4.00

Relevant Coursework: Introduction to Computer Science I & II (C++), Discrete Mathematics

TECHNICAL SKILLS

Languages: JavaScript, Python, C++, HTML, CSS

Frameworks & Libraries: React.js, Node.js, Express.js, NestJS, Prisma, PyTorch

Databases: MongoDB, Supabase, PostgreSQL

Developer Tools: Git, GitHub, Figma, VSCode, Arduino, REST APIs, CRUD Operations, Responsive UI Design

EXPERIENCE & LEADERSHIP

Videra Digital Ltd

Co-Founder & Lead Frontend Engineer — SaaS company building data management ecosystems

May 2025 – Present

Kampala, Uganda

- Serve as Lead Frontend Engineer and Head of Operations; manage a team of 2 developers, 1 UI/UX designer, and a Head of Finance as full-time university students, establishing contribution structures and workflows that keep the team shipping consistently.
- Architect and maintain the entire frontend codebase across all Videra products, ensuring pixel-perfect, fully responsive implementations across devices.
- When the backend engineer stepped down, independently learned NestJS, Prisma, and Supabase within two weeks to ship a critical feature on schedule and meet a client commitment without delay.
- Drive all product direction, technical strategy, and company roadmap as a co-founder alongside engineering responsibilities.
- Own all marketing and public-facing communications across LinkedIn and Instagram, building brand presence from the ground up.

VoteAble

Founder & CEO — Cloud-based electronic voting platform for schools

July 2022 – Present

Kampala, Uganda

- Built and launched a full-stack multi-tenant e-voting platform that replaced a legacy system at Aga Khan High School Kampala, part of the global Aga Khan Education Services network, and has run every student council election without issue since 2022.
- Compressed the school's election cycle from one month to one week by centralising candidate vetting, voting, and real-time results in one platform.
- Engineered secure authentication, dynamic subdomain routing, school-scoped data isolation, real-time vote tallying, and granular role-based admin dashboards.
- Platform draws 2,000+ monthly visits during election season; pursuing annual school subscriptions as a monetisation model.

UpLift Establishment Limited

Frontend Web Developer

April 2023 – September 2023

Mukono, Uganda

- Designed and shipped a fully responsive website from scratch; overhauled UI navigation and produced dynamic media galleries that strengthened the company's digital brand presence.

PROJECTS

Cadera — Cloud School Information System

React, NestJS, Prisma, Supabase (PostgreSQL)

- Originally contracted by Makarios Junior School; pivoted into a multi-tenant SaaS platform after recognising broader market potential. MVP delivered by a team of 2 developers and 1 UI/UX designer in 6 months.
- Centralises gradebooks, report card generation, attendance tracking, real-time analytics, and full student records for African schools. Features role-based access for admins, head teachers, and class teachers; exportable PDF report cards.
- Currently live in production; architected to scale across East Africa and the continent entire.

VoteAble — Electronic Voting Platform

React, Node.js, Express.js, MongoDB, Render

- Scalable multi-tenant voting system with dynamic subdomain routing, school-scoped data isolation, real-time tallying, and role-based access. Deployed on Render; optimised for mobile.
