What our IB DP students had to say

Ethan

Aga Khan High School has a strong IB program which provides excellent preparations for the international board examinations. The diversity and competitive spirit amongst the students kept me motivated to do my best. I thank my teachers at Aga Khan High School for their continuous guidance, testing and homework and I am grateful to my parents for their support, and their constant encouragement. I will be joining Michigan State University, (Honors College) to study Actuarial Science on a full-ride merit scholarship which includes tuition, room and board, a paid professor's assistantship, and a summer experiential learning trip.

Param

I am deeply grateful to my classmates, Aga Khan High School faculty and my parents for the encouragement, guidance and support that helped me to excel through out the IB journey. I will be pursuing Mechanical Engineering at the University College Dublin in Ireland and I look forward to stepping into an exciting future of innovation and discovery.

Tahsan

Am one of the lucky students who got a fully-funded scholarship from the University of British Columbia after excelling in my IB exams. I thank all the teachers, lab technicians. Because as much as it's my feat, it's also their efforts to produce such good results. Wherever I will go, I will be known as a student from Aga Khan High School.

Albert

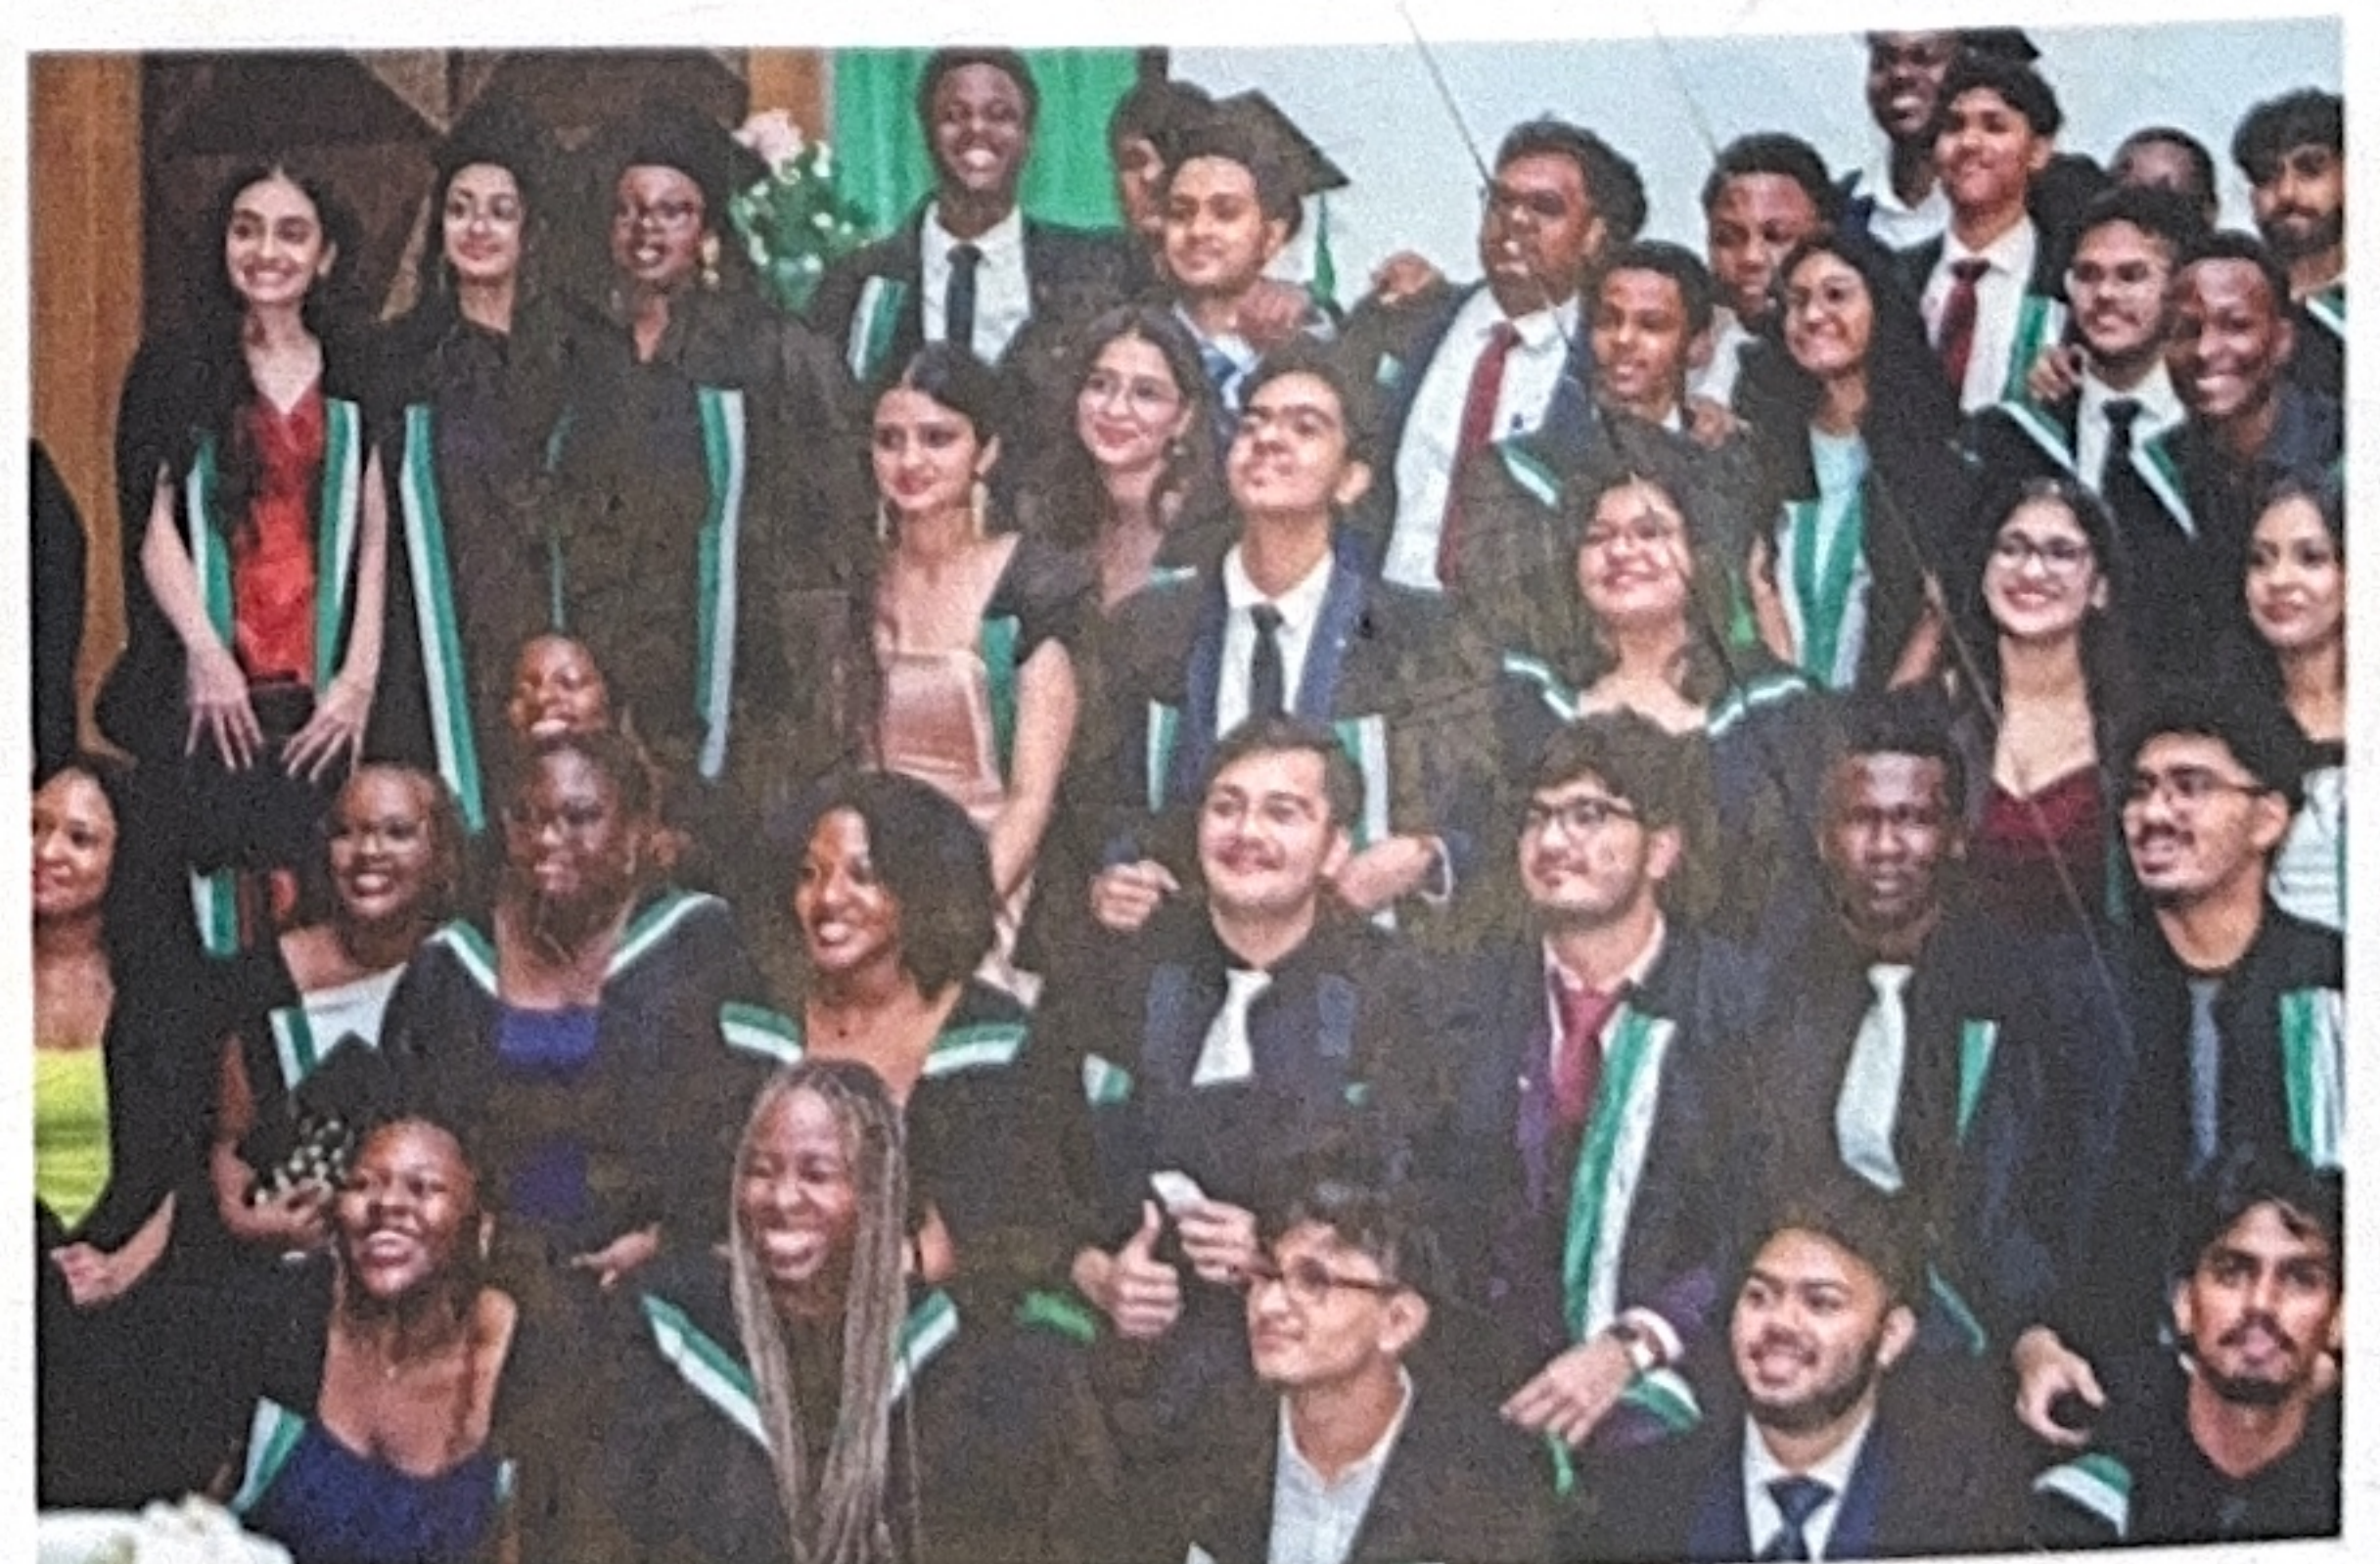

Ever since I joined Aga Khan High School for my KG1 in 2009, the school has been my second home. It's a bit sad that after my graduation I had to leave my friends and teachers I have known for so long. Am happy that after my IB exams I was accepted to Howest University of Applied Sciences in Belgium for a three year degree in Industrial Product Design and I promise to keep the Aga Khan High School flag and Uganda flag high in Belgium.

Lyzbet

I am happy that I excelled in the IB exams and I thank my teachers at Aga Khan High School who taught me and nurtured me both academically and in co-curricular activities such as basketball. As I am preparing for my bachelor's degree in Biotechnology at Technological University of Shannon in Ireland. I am ready to show the world that Aga Khan High School not only produces academic giants but also multi-talented students.

Rusheel

I come from India and I joined Aga Khan High School in Grade 5. Even before I came to Uganda, I knew Aga Khan High School was the best school in Uganda because my cousins were studying from there. So far the years I have been in this school are the best years of my life. My fellow classmates always motivated me to read hard for the IB exams. I will miss the entire school community. I will be pursuing my Bachelor of Medicine, Bachelor of Surgery at International Medical University in Malaysia.
